

WHAT IS RHINITIS?

RHINITIS

- **Inflammation & swelling of mucous membrane of nose**
- **Eyes, ears, sinuses, & throat can also be involved.**

Rhinitis, also known as coryza, is irritation and inflammation of the mucous membrane inside the nose. Common symptoms are a stuffy nose, runny nose, sneezing, and post-nasal drip. ... The most common kind of rhinitis is allergic rhinitis, which is usually triggered by airborne allergens such as pollen and dander.

REASONS OF RHINITIS DISORDERS

- Allergic Rhinitis. Avoiding the substance that triggers the allergy prevents symptoms but is often not possible. Nasal corticosteroid sprays decrease nasal inflammation caused by many sources and are relatively safe for long-term use. ...
- Acute viral rhinitis.
- Chronic rhinitis.
- Atrophic rhinitis.
- Vasomotor rhinitis.

SYMPTOMS OF RHINITIS DISORDERS

- Stuffy nose.
- Runny nose.
- Sneezing.
- Mucus (phlegm) in the throat (postnasal drip)
- Cough.
