

## WHAT IS WORMS?

Tapeworms are flat, segmented worms that live in the intestines of some animals. Animals can become infected with these parasites when grazing in pastures or drinking contaminated water. Eating undercooked meat from infected animals is the main cause of tapeworm infection in people.

## CAUSES WORMS

One of the leading causes of stomach ache in children is intestinal infection which is mostly caused by intestinal parasites such as worms. There are different types of intestinal worms that can cause worm infections, but the most common are tapeworms, roundworms, pinworms or threadworms and hookworms.
