

## **WHAT IS DELAY IN MONTHLY CYCLE**

The menstrual cycle is the regular natural change that occurs in the female reproductive system that makes pregnancy possible. The cycle is required for the production of oocytes, and for the preparation of the uterus for pregnancy

## **REASON OF DELAY IN MONTHLY CYCLE**

Missed or late periods happen for many reasons other than pregnancy. Common causes can range from hormonal imbalances to serious medical conditions. There are also two times in a woman's life when it's totally normal for her period to be irregular: when it first begins, and when menopause starts.

## **IN ADDITION TO MISSED PERIODS, HERE ARE ADDITIONAL SYMPTOMS WOMEN MAY NOTICE:**

- Hirsutism, or excess hair growth in unexpected places like face, back, thumbs, toes, chest, and abdomen.
- Hair loss.
- Infertility.
- Weight gain.
- Acne.
- Mood disruption.
- Pelvic pain.
- Sleep problems.

## **NEUROTHERAPY TREATMENT**

- (6) Medulla
- (4) Thyroid (P)
- (6) Lt+Ov.

If within 12 hour the menstruation cycle does not start, then give:- P-Heparin
